Leica iCON gps 60 Smart positioning on any construction site

Leica iCON gps 60 is a versatile SmartAntenna for all construction positioning tasks.

Featuring superior GNSS technology and various integrated communication options, it meets all your requirements for reliable and accurate measurements. Its intuitive display shows full status information of the instrument, simplifying operation and configuration. Leica iCON gps 60 also offers exceptional network capabilities allowing you to use RTK network services (Leica SmartNet and other networks) for highly reliable, improved GPS positions.

- Superior GNSS Technology for maximum accuracy and reliability. Features Leica SmartTrack+ and SmartCheck+.
- Future-proof satellite tracking. Works with all existing and future satellite systems.
- Multi-purpose GPS solution. Can be used as construction site GNSS Base, Rover or NetRover, in supervisor vehicle on site and entry level machine control mounted inside a machine.
- Unique communication flexibility, featuring integrated radio, modem and Bluetooth[®].
- HSPA modem provides excellent network performance.
- Integrated NTRIP Server and Caster for Internet based Reference Station.
- No controller required for base station set-up means you need less hardware.
- Unique flexible software licensing and feature upgrade concept. You can order packages or individual licenses when you need them, investing when you need to.

LEMO serial port Connector for external radio antenna USB for direct data transfer Battery bay for GEB221 or GEB212 batteries. (large or small Leica batteries) Navigation keys for receiver 40x25mm (1.8") configuration Display for configuration and Internal modem status information antenna

- when it has to be right

Leica iCON gps 60 One instrument for many tasks

Perform many positioning tasks yourself, easily and quickly. Check grade or cut & fill, stake-out points and lines and as built checks.

Leica iCON gps 60 is the perfect mobile base station for your construction site. You don't need a controller for base station set-up. Stream corrections over the Internet without Radio.

Save time and increase your productivity monitoring the grade from your supervisor vehicle on site.

Use Leica iCON gps 60 for easy, single grade machine control applications, further increasing the value of the product and your investment.

Technical Specifications

	Leica iCG60 GNSS SmartAn	Antenna					
		Leica ICG60 Demo	Leica ICG60 Vehicle	Leica ICG60 Base	Leica ICG60 Network	Leica ICG60 Performance	Leica ICG60 Advanced

✓ Standard / • optional

GNSS Perfor- mance	GNSS technology	Leica patented SmartTrack+ technology: • Advanced measurement engine • Jamming resistant measurements • High precision pulse aperture multipath correlator for pseudorange measurements • Minimum acquisition time
	No. of channels	120 channels
	Max. simultaneous tracked satellites	up to 60 Satellites simultaneously on two frequencies
	Satellite signals tracking	• GPS: L1, L2, L2C, L5 • GLONASS: L1, L2 • Galileo (Test): GIOVE-A, GIOVE-B • Galileo: E1, E5a, E5b, Alt-BOC • Beidou
	GNSS measurements	Fully independent code and phase measurements of all frequencies • GPS: carrier phase full wave length, Code (C/A, P, C Code) • GLONASS: carrier phase full wave length, Code (C/A, P narrow Code) • Galileo: carrier phase full wave length, Code • Beidou: carrier phase full wave length, Code
	Reacquisition time	< 1 sec
GNSS Antenna	GNSS antenna options	Fully integrated GNSS antenna External GNSS antenna connector (Type TNC)
	External GNSS Antenna options	CGA60: GPS L1/L2//L5, GLONASS L1/L2, Galileo E1, E5a, E5b, Alt-BOC, BeiDou B1, B2

Measurement	Accuracy (rms) with real-time (RTK) ¹⁾						
Performance &	Dynamic RTK Positioning Accuracy, after initialisation	Horizontal: 10 mm + 1 ppm (rms)					
Accuracy		Vertical: 20 mm + 1 ppm (rms)					
	Accuracy (rms) with post processing 1)						
	Static (phase) with long observations	Horizontal: 3 mm + 0.5 ppm (rms) Vertical: 6 mm + 0.5 ppm (rms)					
	Kinematic (phase)	Horizontal: 10 mm + 1 ppm (rms) Vertical: 20 mm + 1 ppm (rms)					
	On-the-fly (OTF) initialization						
	RTK technology	Leica SmartCheck+ technology					
	Reliability of OTF initialization	Better than 99,99%					
	Time for initalization	Typically 4 sec ²⁾					
	OTF range	up to 70 km ²					
	Network RTK						
	Network technology	Leica SmartRTK technology					
	Supported RTK network solutions	iMAX, VRS, FKP					
	Supported RTK network standards	MAC (Master Auxiliary Concept) approved by RTCM SC 104					
Hardware	Weight & Dimensions						
Hardware	Weight (iCG60)	1450 g (3,19 lb)					
	Weight	3215g (7,16 lb) Standard RTK Network Rover, incl. iCG60, CC50 Controller with Bracket, Pole, Battery					
	Dimensions	197 mm x 197 mm x 130 mm (7,76 in x 7,76 in x 5,12 in)					
	Environmental specifications						
	Operating temperature	-40°C to +60°C (-40 F to +140 F)					
	Storage temperature	-40°C to +85°C (-40 F to +185 F)					
	Humidity	100%, compliance with ISO9022-12-04 and MIL STD 810F – 507.4-1					
	Proof against: water, sand and dust	IP67 according IEC60529 and MIL STD 810F - 506.4-I, MIL STD 810F - 510.4-I and					
		MIL STD 810F - 512.4-I, Protected against blowing rain and dust, Protected against temporary submersion into water (max. depth 1 m)					
	Vibration	MIL-STD-810F, Figure 514.5C-3					
	Shock	40g - 6msec; compliance ISO 9022-31-06, No loss of lock to satellite signal when used on a pole set-up and submitted to pole bumps up to 150 mm					
	Drops	Withstands 1.2 m drop onto hard surfaces					
	Topple over	Withstands topple over from a 2m pole onto hard surfaces					
	Power & Electrical						
	Supply voltage	Nominal 12 V DC, Range 9.0 – 28 V DC					
	Power consumption	Typically 6W					
	Internal power supply	1x recharge & removable LI-Ion battery, 2.6 Ah, 4.4 Ah or 6.0 Ah / 7.4 V, fit into receiver					
	Internal power supply, operation time	 5:20 h receiving RTK data with standard radio ³⁾ 4:40 h transmitting RTK data with standard radio ³⁾ 					
		5:00 h RTK via built-in HSPA connection 3					
	External power supply	Rechargeable external NiMh battery 9 Ah / 12 V; with voltage peak protection, Fullfils EN13309					
	Certifications Compliance to: FCC/IC Class B, CE, EN13309, C-Tick, ARIB STD-T66, ROHS, WEEE, ACPEIP						
Memory & Data	Memory						
Recording	Internal memory	Built-in memory, 466 MB					
	Data capacity	466 MB is typically sufficient for about GPS & GLONASS (8+4 satellites) 3'100 h raw data logging at 15 s rate					
	Data recording						
	Type of data	Onboard recording of RINEX data					
	Recording rate	Up to 20 Hz					
Interface	Buttons	ON / OFF button 6 function buttons (arrow keys - up/down/left/right, Enter, Esc)					
	Display	 High resolution, 1.8" gray scale display with adjustable backlight Provides full receiver status on main screen (position, satellite, radio, modem, battery, Bluetooth[®], telematics, memory) Several sub-menus for additional details Various configurations in sub-menus, e.g. radio channel Start Base Station with "Here" or type in coordinate Start and configure raw data logging 					
	LED status indicator	1x LED for detailed power status					
	Additional functionality	BasePilot functionality (stores up to different 100 base station locations and configurations for quick					
		daily start up without user interaction)					

¹¹ Measurement precision and accuracy in position and accuracy in height are dependent upon various factors including number of satellites, geometry, observation time, ephemeris accuracy, ionospheric conditions, multipath etc. Figures quoted assume normal to favorable conditions. Times required are dependent upon various factors including number of satellites, geometry, ionospheric conditions, multipath etc. GPS and GLONASS can increase performance and accuracy by up to 30% relative to GPS only. A full Galileo, Beidou and GPS L5 constellation will further increase measurement performance and accuracy.

²¹ Might vary due to atmospheric conditions, signal multipath, obstructions, signal geometry and number of tracked signals.

Might vary with temperatures, age of battery, transmit power of data link device.
