# TRADEUP

SAVE THOUSANDS TODAY AND UPGRADE TO THE LATEST GNSS TECHNOLOGY WHEN YOU TRADE IN YOUR ANTENNA AND CONTROLLER.

## GS18 T + CS20

UP TO:

**\$8,000**

credit towards a new GS18 T and CS20, when you trade in your old antenna and controller

## GS16 + CS20

UP TO:

**\$6,000**

credit towards a new GS16 and CS20, when you trade in your old antenna and controller

## CS20

UP TO:

**\$2,500**

credit towards a new CS20, when you trade in your old controller

### GS18 T Features

- Calibration-free tilt compensation immune to magnetic disturbances through the innovative combination of GNSS and IMU technology
- Self-learning, 555 channels GNSS Receiver
- Tracks ALL GNSS constellation signals
- Leica RTK Plus, adaptive on-the-fly satellite selection providing superior performance in heavy canopy situations
- Smart-Link and Smart-Link Fill, keeping you connected even when your radio link fails due to loss of internet connection

### GS16 Features

- Self-learning, 555 channels GNSS Receiver
- Tracks ALL GNSS constellation signals
- Leica RTK Plus, adaptive on-the-fly satellite selection providing superior performance in heavy canopy situations
- Smart-Link and Smart-Link Fill, keeping you connected even when your radio link fails due to loss of internet connection

### CS20 Features

- Power of 3D data in a rugged full qwerty keyboard IP68 mil spec controller
- Simplicity of Touch screen complete user control interface
- 5" landscape sunlight-readable WVGA color screen
- Integrated DISTO™ for accurate electronic distance measuring
- Radio and antenna for long-range robotic Total Station control
